

DESCRIPTION

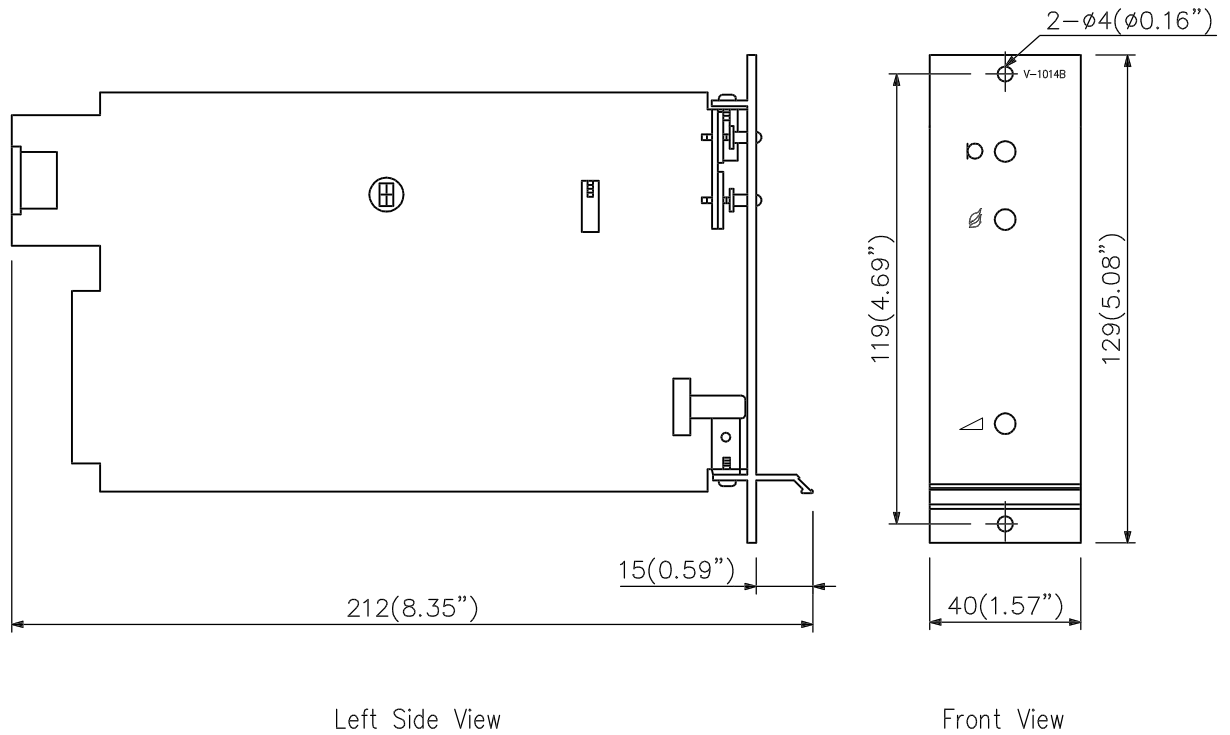

The V-1014B is an alert signal module can generate siren, yelp or buzzer signal inconjunction with the mixer flame V-1000B or the VM series mixer power amplifier.

SPECIFICATIONS

Power Requirement	24 V DC
Current consumption	35 mA
Signal	Siren, Yelp or buzzer (switchable)
Frequency Response	Siren : 400 Hz~750 Hz Yelp : 500 Hz~750 Hz Buzzer : 400 Hz
Sounding Time	Approx. 5×60 s (variable)
Output Level	100 mV
Output Impedance	10 kΩ
Indicators	Siren/Yelp/Busser : Red LED Speech : Green LED
Controls	1 output level control 1 sounding time control
Connections	Indication Output : 5-pin DIN Socket Signal Output & power received : 10-pin card edge connector
Color	Black
Dimensions(W×H×D)	40 (1.57")×129 (5.08")×212 (8.35") mm
Weight	140 g (0.31 lb.)

* This module works on the highest priority always when operated.
